Dermylex[®]

Mechanism of Action

Without Treatment

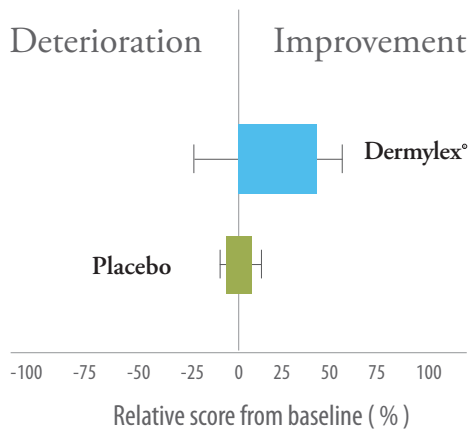

With Treatment

• APC : Antigen Presenting Cell

Clinical Results Summary

Figure 1 :

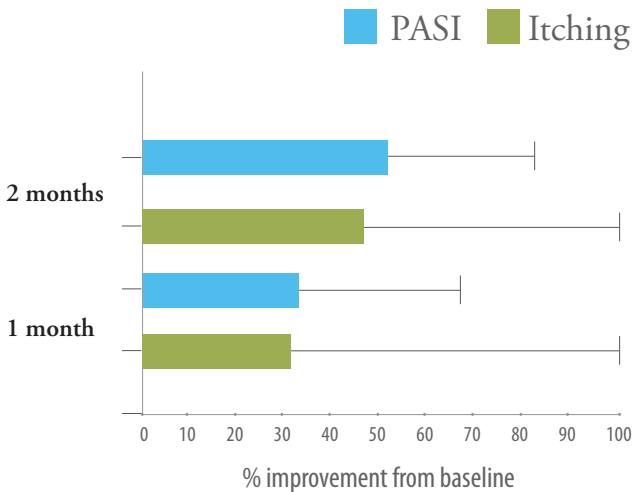

Relative improvements of study endpoints from baseline (day 1) to day 56 for Psoriasis Area and Severity Index (PASI).

Solid bars represent the distribution of patient scores under Dermylex® (blue) or placebo (green), and error bars represent extreme observations.

Dermylex[®]

Post-Marketing Survey: Preliminary Results With Topicals

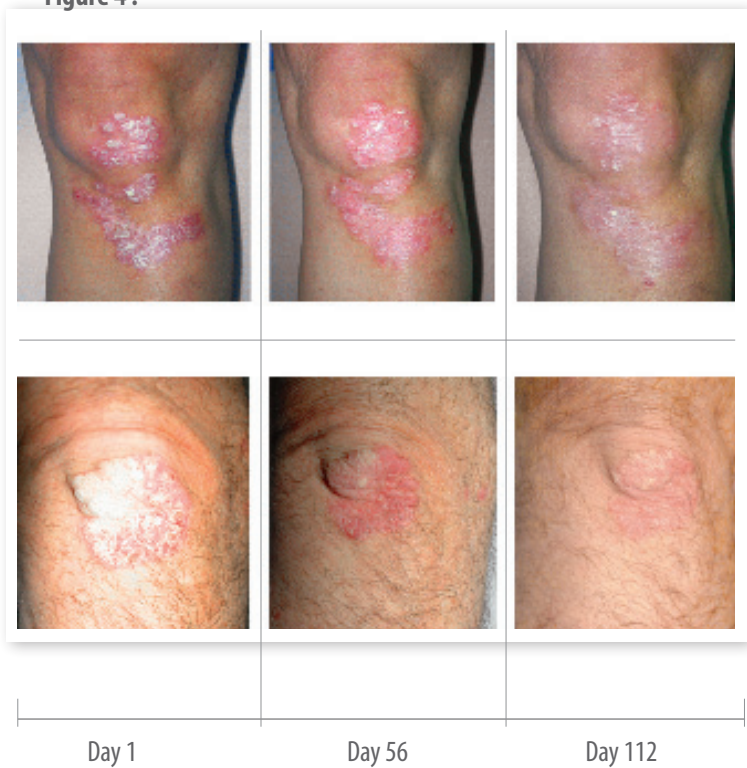

Figure 2:

Survey conducted on consumers using Dermylex[®] shows that the use of Dermylex[®] as a complementary treatment with topical medication (corticosteroids and vitamin-D derivatives) may create a synergistic effect and improve overall efficacy on PASI improvement and itching.

Example of patients' improvements in clinical studies²

Figure 4:

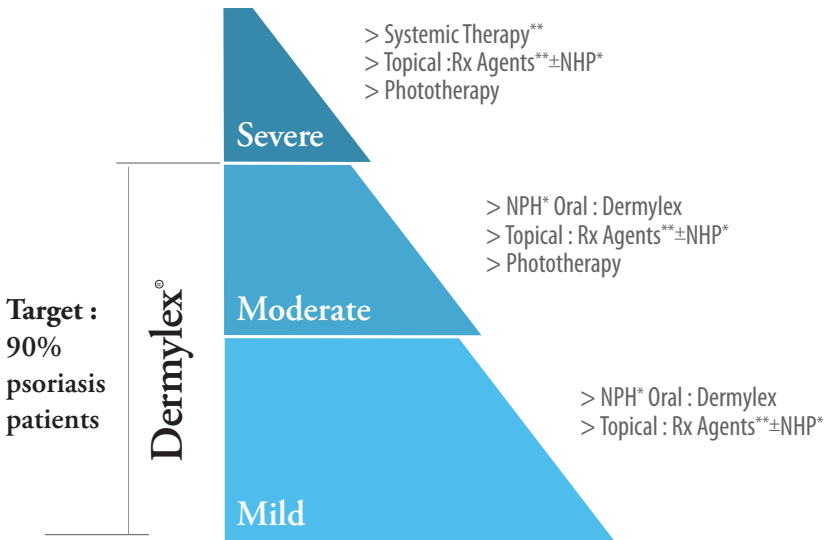

² May not be representative of all mild-to-moderate psoriasis patients.

Dermylex[®]

Psoriasis Treatment Paradigm

Figure 3 :

* NHP with proven efficacy vs. placebo

** For more information consult your health care specialist

Advantages

✓ Proven Efficacy

In multiple double-blind against placebo clinical studies. A majority of patients improved their PASI¹ score up to 65% with Dermylex after only 56 days (fig. 1 and 4).

✓ No side effects

From a natural source, Dermylex is safe.
May be used as a complementary treatment to topical medication (fig. 2)

✓ Convenient

1 tablet, twice a day.

✓ Natural

Protein complex from dairy origin with high content in growth factors

✓ 8 weeks treatment

Suggested initial treatment duration :
8 weeks

Dermylex® is also available in Taiwan and Pakistan.

In the USA, Dermylex® is also available as BioDerm and Dermalyx, and in France as Psopax.

¹ PASI: Psoriasis Area and Severity Index.

Dermylex[®]

Informations

INGREDIENT INFORMATION

Available in 60 caplets.

Each caplet contains: Purified whey protein fraction . . . 400 mg

Dermylex[®] contains dairy proteins and residual lactose (>0.05%).

Non-Medicinal Ingredients: Sorbitol, microcrystalline cellulose, povidone, croscarmellose sodium, colloidal silicon dioxide, magnesium stearate, hydroxypropyl cellulose, ethanol, purified water, polyethylene glycol.

DIRECTIONS FOR TAKING DERMYLEX[®]

Adults - Take 1 caplet, twice daily before meals.

Keep in a cool, dry place away from children. Although Dermylex[®] does not replace topical treatment or laser treatment, it is expected to improve efficacy in combination with these.

Suggested initial treatment duration: 2 months.

WARNINGS AND PRECAUTIONS

Consult a healthcare practitioner prior to use if you are pregnant, nursing or taking any medication. Do not use Dermylex[®] if you are allergic to dairy products. There are no drugs or nutrients that are known to interact with this product. There are no more side effects when taking Dermylex[®] than when using a placebo.
